

Assessment Building Service

We Transform Your Tests

Why It Matters

Rebuilding assessments can feel overwhelming if your district is:

- Starting fresh with new assessments
- Working from Google Docs or PDFs
- Migrating from another system

Most platforms leave that work to districts. Otus takes it off your plate.

What We Do

Our team builds your assessments directly in Otus, organized for teachers, engaging for students, and ready to use.

- Expertly designed by former educators
- Access to 65+ item types with auto-scoring
- Faster implementation with assessments built for you

How It Works

The Assessment Building Service is an optional add-on for Otus clients. Pricing is customized based on the number and complexity of assessments. Here's what happens if your district is interested:

- **Share Your Assessments:** Provide 2–3 examples so we can understand the scope
- **Get a Quote:** We'll review the number and complexity of assessments and give you a clear cost estimate
- **We Do the Work:** Our team builds and formats assessments in Otus for teachers and students to start using right away

Assessments We've Built for Districts:

- ✓ CFAs
- ✓ Benchmark assessments
- ✓ Unit tests from core curriculum
- ✓ Teacher-created tests
