Assessments Completed

## Challenge

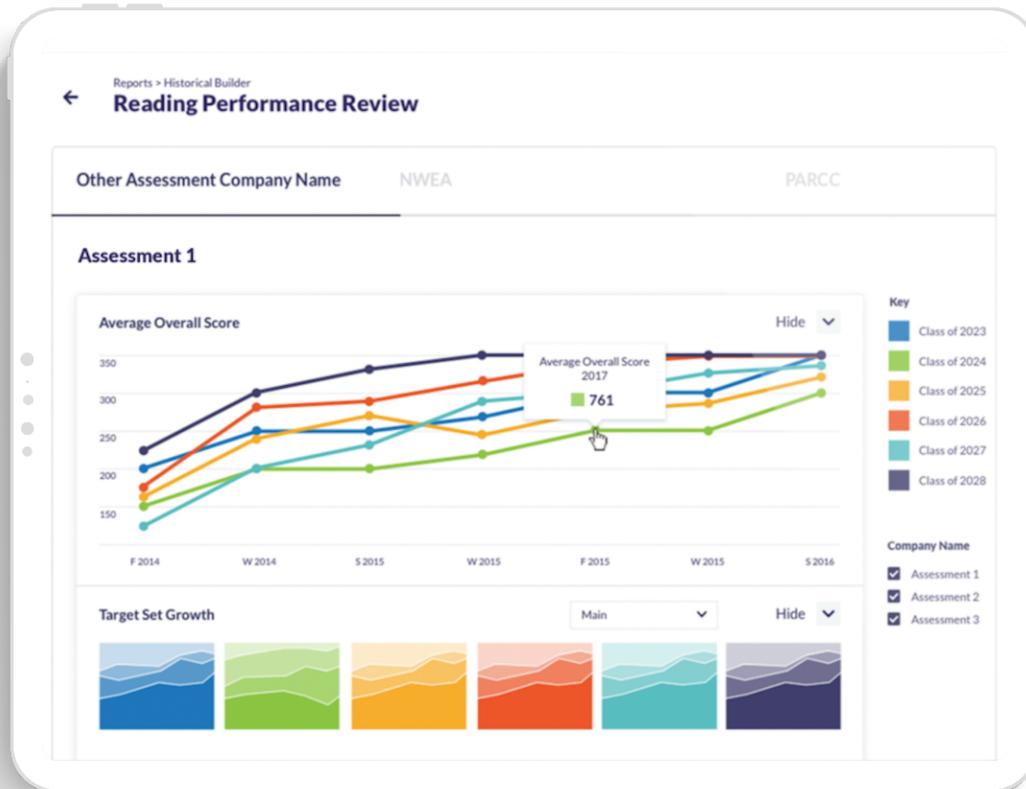

Milton Public Schools wanted to create a clearer picture of their students' growth by better leveraging common assessments. The problem was that assessment data was fragmented as they were struggling to combine the data they already had from statewide tests such as PSAT/SAT, MCAS, and AP and with other standards-aligned assessment data. They began looking for a platform that would do the heavy lifting of combining the data, and give them quick and actionable insights.

## Actions

The leadership of Milton approached Otus with a clear picture of what they wanted for their district. They decided Otus was the perfect fit and would allow them to both administer and analyze common assessments in one easy-to-manage place. They would also be able to leverage the third-party data test data, giving the teachers and administrators deeper insights into student growth.

## Results

Since implementing Otus in 2019, the students of Milton have completed over 53,000 assessments. Milton's common assessments are now being combined with third-party data points and standards-aligned assessments to give one comprehensive view of their students. Teachers and administrators are now able to spend less time finding data and more time leveraging it to make data-informed decisions to promote student growth.

## Meet Otus

# Advanced Analytics

Otus brings all your student data together in one place, allowing you to spend less time finding relevant data and more time acting on it. Seamlessly access existing data with Otus' library of third-party data partners like NWEA, iReady and Renaissance. Discover trends in student populations based on performance, demographic, behavioral or social-emotional data that allow educators to quickly make data-informed decisions.

### Student Performance

To see your students for who they are, look beyond academic performance.

### Item Analysis

See performance on classroom, benchmark, state and national assessments.

### Cohort Analysis

See how students in a cohort move from low to higher performance targets on the same test over time.

### Performance Data

Drill into a single point-in-time to understand the breakdown of performance for each cohort.

## Software with a growth mindset

K-12 administrators, educators, students and families deal with disconnected edtech tools every day. Otus minimizes the chaos by providing one seamless platform to teach, grade, analyze and plan.

Access learning management, assessment, data and progress monitoring tools in one system, with one login. With Otus, school leaders can focus on student learning, not technology.
