## Challenge

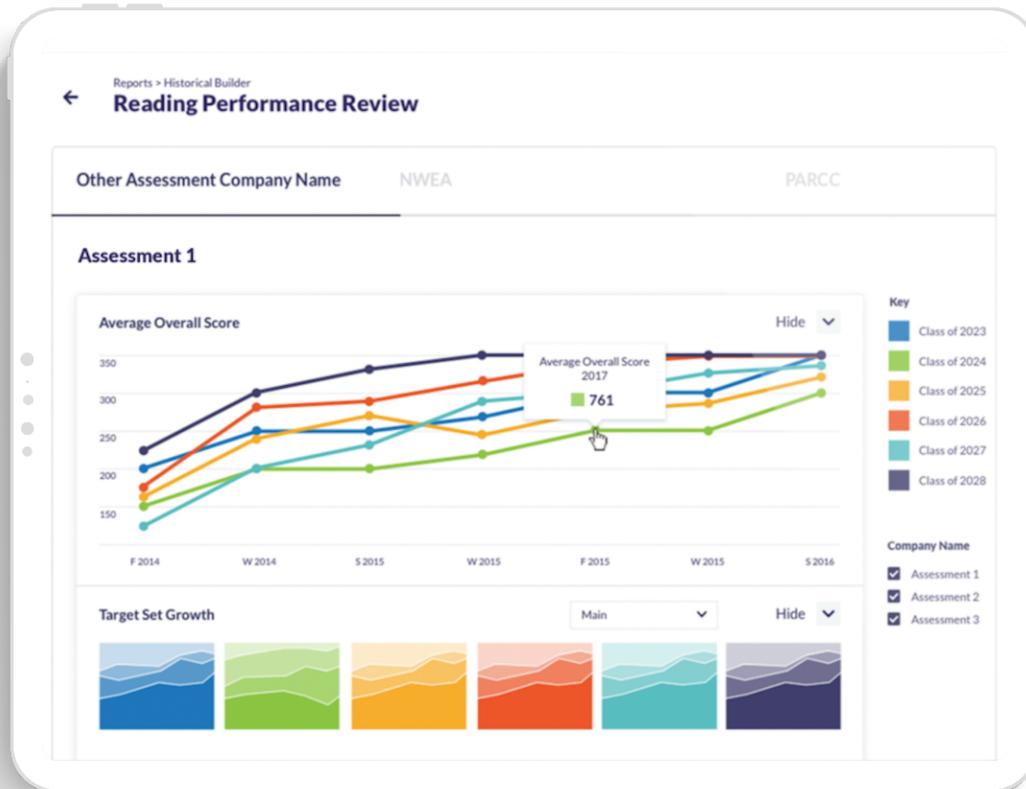

Perry Local School District needed a way to store their student data and also a way to access and analyze it. The goal was to be able to leverage both local and national data to track student growth. They believed they could achieve this holistic view if they were able to combine multiple data sources such as AIR, iReady, Aimsweb, ITBS and ACT. All they needed was a platform that could ingest all this data and make it easily accessible.

## Actions

Otus was a perfect match for Perry Local SD. Data that was previously tracked in various systems and spreadsheets was now available in one place for educators to analyze and act upon. Easy to understand visuals of third-party data contributed to data-rich conversations about student growth in the district.

## Results

Since implementing Otus in 2018, Perry Local SD has used the platform to aggregate and analyze third-party data, and now also utilizes Otus for assessments. Using the Navigate item bank, teachers have been able to quickly build, administer and share assessments which now number over 54,000. This assessment data in combination with third-party data has allowed teachers and administrators to have valuable, data-informed conversations about student growth.

## Meet Otus

# Advanced Analytics

Otus brings all your student data together in one place, allowing you to spend less time finding relevant data and more time acting on it. Seamlessly access existing data with Otus' library of third-party data partners like NWEA, iReady and Renaissance. Discover trends in student populations based on performance, demographic, behavioral or social-emotional data that allow educators to quickly make data-informed decisions.

### Student Performance

To see your students for who they are, look beyond academic performance.

### Item Analysis

See performance on classroom, benchmark, state and national assessments.

### Cohort Analysis

See how students in a cohort move from low to higher performance targets on the same test over time.

### Performance Data

Drill into a single point-in-time to understand the breakdown of performance for each cohort.

## Software with a growth mindset

K-12 administrators, educators, students and families deal with disconnected edtech tools every day. Otus minimizes the chaos by providing one seamless platform to teach, grade, analyze and plan.

Access learning management, assessment, data and progress monitoring tools in one system, with one login. With Otus, school leaders can focus on student learning, not technology.
